# International domain name (IDN) codes

---

## Introduction

You can register .com, .net, and .org domain names that use non-English characters. The Registry requires that the SLD be PUNY-encoded.

An IDN conversion tool for PUNY encoding is available at  
<http://mct.verisign-grs.com/index.shtml>

## IDN codes

The table below gives the IDN codes for all languages supported by the .com Registry.

Language	IDNCode
